**UNLEASH  
THE MAGIC OF  
COLOR—DYNAMIC  
LIGHTING DESIGN  
MADE EASY**

When featured spaces call for visual drama, bold effects, and dynamic saturated color that capture attention and highlight architectural accents, the Hydrel family of RGB luminaires provide the optimal solution. With a full palette of colors, your vision is easily installed, seamlessly controlled, and certified to work effortlessly.

**The Dynamic Saturated Color Required for Your Design**

Architainment Color takes the classic dynamic lighting effects so often seen in themed or theatrical settings, and makes them accessible for mainstream commercial applications. Architects and lighting designers now have the ability with Architainment Color to create bold, transformational effects for everyday spaces.

**Controls — Easy installation and Limitless Options**

Installation is easy with Remote Device Management (RDM) technology, now available in all Hydrel RGB luminaires. Installation and configuration used to require upfront design and coordination to pre-program each luminaire, limiting you to set locations. Now, RDM technology eliminates the previous complexity, allowing you to program and re-program any luminaire quickly and easily in the field.

Acuity Controls Easy!™ and Fresco™ controllers offer an easy-to-use interface that works seamlessly with Hydrel's RGB luminaires. Using industry standard DMX-512, the Easy! and Fresco controllers offer limitless options from simple pre-set shows to complete manual control to create the desired effect in your space.

**A+ Certified**

Some configurations are A+ capable and can be part of an A+ certified solution. A+ Certified solutions from Acuity Brands help you quickly and confidently select and implement lighting systems, for indoor or outdoor applications, that are both compatible and consistent.
